<thead>
<tr>
<th>Level</th>
<th>E. coli/100ml (Single Event)</th>
<th>E. coli/100ml (30 day geo-mean)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 1</td>
<td>0-300</td>
<td>0-130</td>
</tr>
<tr>
<td>Level 2</td>
<td>301-1000</td>
<td>131-1000</td>
</tr>
<tr>
<td>Level 3</td>
<td>&gt;10000</td>
<td>&gt;10000</td>
</tr>
</tbody>
</table>

**Note:** Beach samples are routinely collected once a week. Therefore E. coli levels may not meet the Michigan Department of Environmental Quality (MDEQ) standards between sampling days. E. coli levels are more likely to increase after a storm.

**Note:** Beaches are sampled using the composite sampling method approved by the MDEQ. Follow-up samples after a Level 2, 3, or 4 will utilize geometric mean.
