Grand Traverse County Health Department

My Baby

at 1 month

Remember:

★ Mom needs a 6-week check-up. It is important to be sure her body has healed.

★ Older children need special time with adults—reading books or playing games.

★ Baby’s next immunizations are due at 2 months of age.

By the 1st month...

♥ Your baby may start having a schedule.
♥ Your baby enjoys Mom or Dad’s voice.
♥ Your baby turns to your voice.
♥ A calm routine may help your baby sleep.

Watch me grow! I can...

- Gain 5–8 ounces per week!
- Grow about 1 inch each month.

Keep me safe ...

- Never leave me unattended on a chair, bed, couch, etc.
- Do not shake me or throw me in the air—my head is fragile.
- Carefully select a babysitter and child care provider.
- Continue to use an approved car seat.
- Never leave me alone in a parked car.
- Put me to sleep on a firm surface on my back with no loose blankets or toys around me. I should be the only soft thing in the crib!
- Make sure I have a smoke-free clean air to breathe; smokers should quit or smoke outside.

Don’t forget . . . I can

- Make small sounds.
- Enjoy looking at bright colors and patterns, but prefer faces.
- Still sleep up to 17 hours a day, and will have longer periods of being awake.
- Become upset if there’s too much noise.
- Raise my head when lying on my tummy.
- Have fussy periods lasting up to 4 hours.
- Have a wide range of stools:
  - Breastfed: range from 5–6 stools per day to 2 stools per week
  - Formula-fed: usually 1 stool a day. Color may vary.

I need...

- To be talked and read to.
- To look at your face and objects with patterns.
- A routine and quiet place to rest.
- Time on my tummy.
- Comfort—rocking, snuggling, singing, gentle words.
- To be held and cuddled during feedings.
- To breastfeed on demand.
- To be bottle-fed 18-26 oz. per day. (1.5-3 oz per feeding every 1-3 hours)
- To have my sucking needs met.
- To have my skin cleaned with every diaper change.

Call my health care provider if I...

- Have a fever.
- Refuse to eat.
- Am vomiting or having diarrhea
- Am acting in a way that concerns you.

(231) 995-6112

www.gtchd.org
Exploring my world . . . I can

- Follow bright objects.
- Recognize parent/caregiver’s face and voice.
- Briefly calm myself by sucking on my hand or listening to your gentle words.

Hey! CHECK ME OUT!

Have you seen me . . .

✓ Make small sounds
✓ Looking at your face
✓ Raise my head when lying on my stomach

The Path to Reading...

1 month

It’s never too early to start making books and language an important part of your child’s life. The small steps you take now will put your child on the road to reading success!

You can:

★ Talk during bath time, playtime, diaper changing time, anytime! Babies learn to talk when you talk to them.
★ Sing during quiet time and rest time. Babies love to hear the rhythm of your voice and it helps to calm them.

Book Corner: Babies like books with simple, large pictures or designs with bright colors. Black, white, and red colors are easy for baby to see at this young age.
